CONTENTS

(continued)

Generation and Breakdown of a Vicious Cycle in Context of Acute Allograft Rejection
P. Häyry, B. Ferry, D. Leszczynski, F. Manca, M. Jaakkola, J. Halttunen, E. von Willebrand, H. Schellekens, and P.vd Meide 52

Eicosanoid Synthesis Associated with Renal Allograft Rejection ..... *M.J. Mangino, C.B. Anderson, K. DeSchryver, J.D. Tyler, G.A. Sicard, and J. Turk* 63

Possible Attenuation of Graft Atherosclerosis by Prostaglandin E Analogues
S. Aziz, M.E. Billingham, and S.W. Jamieson 71

A Role for Thromboxane in Immune Mediated Renal Injury ..... *V.E. Kelley* 77

Nature and Origin of Burn Immunologic Alteration ..... *M. Paubert-Braquet* 83

Platelet Activating Factor and Allograft Rejection ..... *G. Camussi* 91

Lipid Mediators in Acute Renal Allograft Rejection ..... *T.M. Coffman, U. Schwertschlag, W.E. Yarger, E. Pirotzky, J. Benveniste, and P.E. Klotman* 94

Clinical Experience With Urine TXB_2 in Acute Renal Allograft Rejection
H.B. Steinhauer, H. Wilms, M. Rüther, and P. Schollmeyer 98

Allosensitized Helper but Not Lytic T Lymphocyte Clones Are Functionally Inhibited by Prostaglandin E_2 ..... *M.L. Jordan, R.A. Hoffman, and R.L. Simmons* 104

The Effect of Donor-Specific Transfusions, 16,16-Dimethyl PGE_2 and Dietary Prostaglandin Precursors on Rat Cardiac Allograft Survival ..... *R.V. Perez, R. Munda, T.J. Heyd, and J.W. Alexander* 110

Renal Preservation by Prostaglandins and Alkaline Buffers: A Comparative Study
D.D. Nghiem, M.H. Elkaki, J.H. Southard, M. Brubacher, D. Scott, and T. Smith 113

Inflammatory Mediators and Cytotoxins in Cardiac Allograft Rejection: Current Results and Ongoing Studies ..... *R.P. Lowry, D. Blais, D. Marghesco, and W.S. Powell* 116
